About US

Since 1996, our global and experienced trainers have delivered across various industries and countries.. Focusing on delivering Health, Safety, and Environment (HSE) training programs for the Oil and Gas sectors, we cater to professionals in logistics and engineering roles. Our training regimen includes a blend of hands-on practical sessions and traditional classroom instruction, tailored to operators with diverse skill sets. Key areas covered encompass HSE protocols, materials handling, and equipment (MHE). With our extensive expertise, our primary objective is to establish a safe working environment to mitigate unexpected expenses.

Our trainers are internationally accredited and experienced with the authority to issue international training certification) in the following categories.
